

The Radio station K-LOVE, heard on 91.9 in our area is a blessing for the day. It is very positive to listen to a station that is not loaded with commercials and has music that doesn't grate on your nerves. It would be very unfortunate if this radio station was taken off the air, to be replaced with a station similar to those already on the air. It is a great community service to provide an alternative station. As well as a station that has little to no commercials so that we can enjoy music and news all the time.
